

Medical Education and Laboratory Support Services

(MELSS)

An established service facility within the Faculty of Medicine, the Medical Education and Laboratory Support Services (MELSS) provides teaching, research and clinical support to clients from the Faculty of Medicine; Schools of Nursing and Pharmacy; Memorial University researchers; and Provincial Health Care Corporations.

In 1993, Multidisciplinary Teaching Laboratories; Electron Microscopy Unit; Histology and Anatomy Laboratories were amalgamated to form MELSS. Since that time Surgical Research Laboratories; Clinical Skills Space; Confocal Digital Imaging Center; Medical Simulation Unit and Flow Cytometry have been added to expand MELSS to the service facility it is today.
