Title: HSIMS Photograph collection
Dates: 1960-1983; predominant 1968-1974
Extent: 12 cm -- 23 information cards -- 2 charts -- 135 photographs

Administrative history:

Health Science Information and Media Services (HSIMS) has been documenting the formation and development of the Faculty of Medicine and the Health Sciences Centre since the first mention of a medical school for Memorial University. The photographs and visual materials in this collection were part of a large display that was created by HSIMS in 1983 on the anniversary of the Medical School at Memorial. It originally hung in the lobby of the Health Sciences Centre until 1984 when it was removed and stored and later, donated to the Faculty of Medicine Founders' Archive.

Custodial history:

After being dismantled from the walls of the Health Sciences Centre, the display was stored in the HSIMS office on the first floor of the Health Sciences Centre. There it remained in storage until being transferred to the Founders' Archive in November 1999.

Scope and content:

Fonds consists of photographs and visual material relating to the planning, staffing, construction, and administration of the Faculty of Medicine and the Health Sciences Centre in which it operates. Fonds is composed of the following series:

- 1.0 Health Sciences and Early Thoughts, 1960-1964
- 2.0 Feasibility Studies, 1965-1967
- 3.0 Acceptance, 1967
- 4.0 Development of Educational Programmes, 1968-1969
- 5.0 Faculty Recruitment, 1968-1969
- 6.0 Construction, 1969-1974
- 7.0 The Mortar That Holds The Bricks Together, 1969-1974
- 8.0 The Early Years, 1973
- 9.0 Graduation, 1973
- 10.0 The Medical School Moves to the HSC, 1973-1978
- 11.0 General Hospital Moves to the HSC, 1978-1978
- 12.0 Medical Consultation, 1823-1983

Source of title:

Title based on contents of the fonds.

Acquisition:

The HSIMS Photograph collection was acquired from Eugene Ryan, one of the original people who worked on the anniversary display and still works with HSIMS.

Arrangement:

When the HSIMS Photograph collection arrived at the Founders' Archive, it was still set up as a visual display. Photographs, charts, diagrams, and other visual material were still mounted on mats, and framed in large glass and metal display frames. Each frame had a heading attached to it as part of the larger display and these headings form the series descriptors for this collection. All photographs and other matters were removed from the mats and frames and placed in archival quality storage materials.

Restrictions:

There are no restrictions on access to or use of the material in this collection. Users should be aware however that all materials in this fonds are protected by copyright. It is the responsibility of the researcher to obtain copyright clearance from the copyright holder(s).

Accruals:

Due to the ongoing photographic activities of the HSIMS office and their efforts to save past materials, further accruals may be expected.

Finding Aid:

File list is available. (item level)
