Overview

University-based medical education programs are structured to produce high-calibre medical practitioners who have the knowledge, skills, and confidence to meet the health care needs of our society. To increase the Medical Education Learner’s chances of success during their education, such programs should strive to maintain both supportive and respectful workplaces and learning environments that are free from intimidation and harassment.

This policy replaces the PGME’s Policy on Intimidation and Harassment (2006).

Purpose

To outline the expectations, guidelines, and processes that are intended to support individuals and sustain a respectful learning environment free from intimidation and harassment in Undergraduate Medical Education (UGME) and Postgraduate Medical Education (PGME) programs at Memorial University of Newfoundland (Memorial).
