

# MEMORIAL UNIVERSITY FAMILY MEDICINE

## *If you come from away...*

If you come from away (not from Newfoundland and Labrador) and are considering a family medicine residency at Memorial University of Newfoundland – have we got a program for you! A solid program that will train you well and “tickle your fancy” all at the same time. This is an amazing province, with a rich cultural heritage and many unique medical challenges. Come for the training and the experience!

We have great preceptors in communities of all sizes in a multitude of locations throughout the province, in New Brunswick and in Nunavut, who love to teach and are highly committed to their practices and their communities.

We also have hiking, camping, canoeing, fishing, foraging, kayaking, sailing, skiing... in a pristine landscape that varies across the province. From mountains, sea coasts and barren plains to rivers and rocky ponds, Newfoundland and Labrador has it all. If you like outdoor adventure, music and kitchen parties, life on *the Rock* is for you. Take these two years and get a solid foundation in family medicine AND an amazing life experience. If you are going to be a stranger somewhere to do your residency, come be a stranger here – you will be seen as a friend we just haven't met yet! You will never live anywhere as unique as Newfoundland and Labrador. Come try it out!

You can read about this province or come here and see it. You can read about hemophilia, hemochromatosis, MEN, Protein C deficiency, ARVC, HDGC, HNPCC ... or come here and see it. (We will still teach you about Lyme disease.) You can get trained for global work by working locally – we will fly you in, boat you out and prepare you for whatever comes your way – here, there and anywhere or everywhere. Want to get to communities with no roads – we have them. Want to know how to transport sick patients from outports – here is where you will be the only resident on the team. And it's a great team. You're not on your own and you're being taught by great docs throughout the program who live this work every day.

Come get the exposure you need in a nurturing safe environment that is fun and supportive and that will blow you away all at the same time! The only thing you might want to fear is that you will fall in love with this province and not want to leave. Come and see how quickly you'll fall in love. Come do something different and make a difference – it could be the best two years of your life!
