E-mail: denise.pilgrim@lghealth.ca

Distance to larger centres: St. John's - 1027 kms Corner Brook - 450 kms  
Gander - 713 kms

Description of hospital, other health related facilities, health personnel in community, and equipment:

Labrador-Grenfell Health (South) serves the population in northern Newfoundland and southern Labrador through a network of hospitals, community health centres and nursing stations. The hospital has 51 beds and is fully accredited with established departments of surgery, internal medicine, pediatrics, obstetrics/gynecology, anesthesia, ophthalmology, orthopedic surgery, ENT, psychiatry, radiology, pathology and community/family medicine with full supporting services.

Training programs for residents and clinical clerks are available throughout the year both in St. Anthony and the smaller communities in the region. The opportunity to gain experience in medical work in an isolated area of Canada, with a distinct northern atmosphere, is combined with an active teaching program prescribed by the senior medical staff.

Two house staff positions are recruited and appointed to the major clinical services. These posts are ideal for recent graduates wishing to obtain further practical training and experience in a specialist field without entering into a formal Royal College Program.

Accommodation: Single bedroom apartments with cooking facilities and shared (coin-operated) laundry facilities.

Cost: Free

Transportation: Coordinate all travel arrangements directly with Dr. Kweku Dankwa or Mrs. Denise Pilgrim.

Where to report on the first day of elective:

Please go to the switchboard and ask for directions to the office of the Pathologist.

Elective/Training Contact: Dr. Kweku Dankwa

October 2010
